## Results

While both sorts are similar in nature to the initial sorts a few things changed.

Sorter 1 switched the order in which “Download resume link” and “HTML Resume” appear on the Resume page. They also switch wanted the contributors to come before the download links.

Sorter 2 agreed with the cards that sorter 1 used, however they moved the cards to show more of a hierarchy structure. So by moving the App and Video Game tabs down a spot, then it is easier to tell that the only way to navigate to that page is by the link from the tab before it.

In the end I used Sorter 2’s hierarchy scheme, however I did change the order back for “download links” and “contributors” on the Video Game page.
